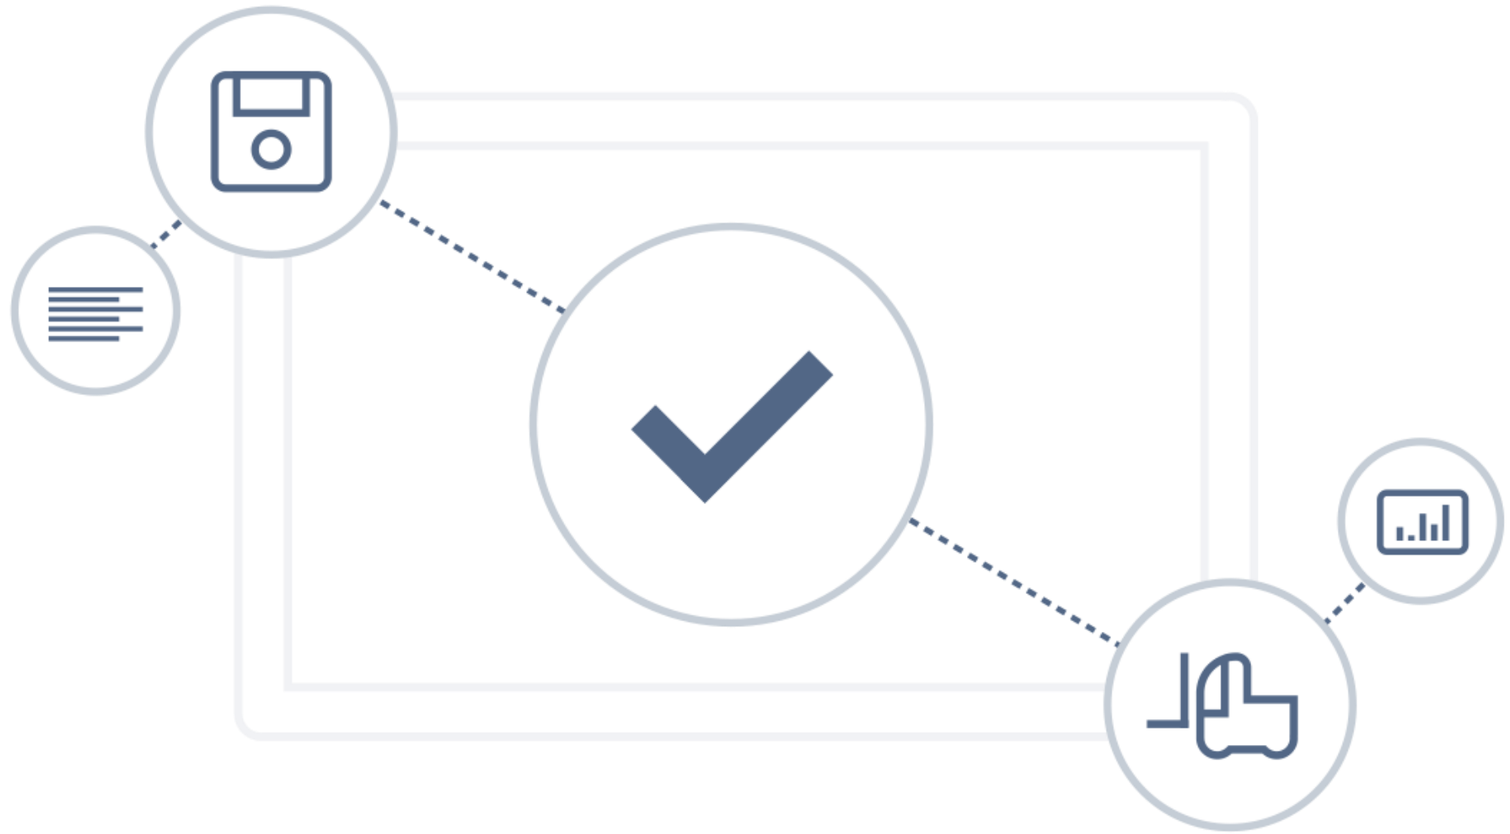
Access control & shock detection



CHECK-BOX

Onboard electronic checklist

Access control & shock detection

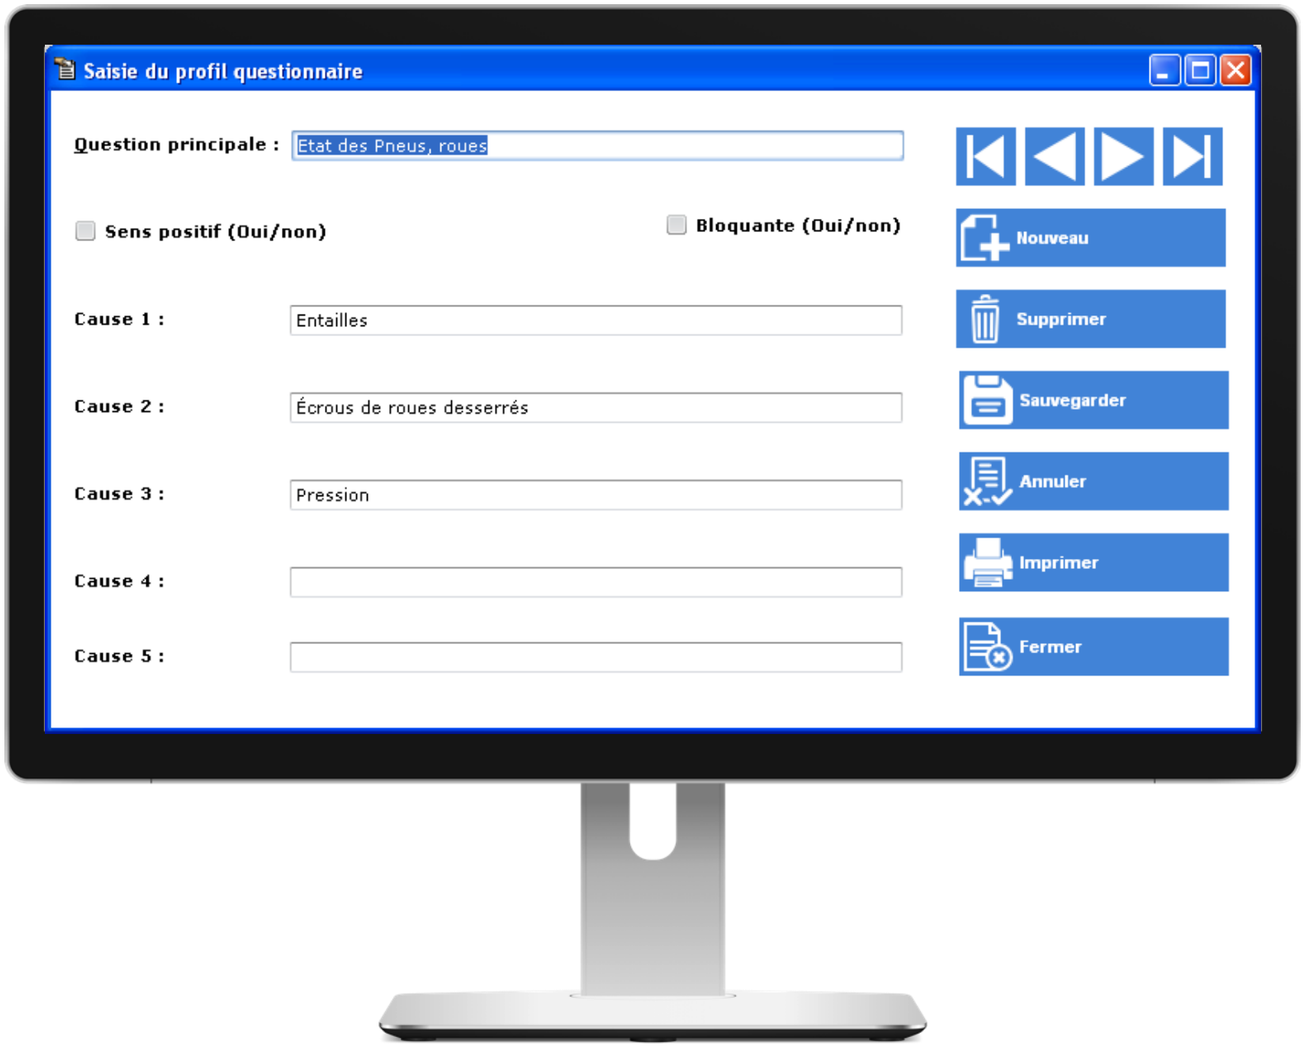
Due to the limitations of the paper checklist and the difficulty of the information control we developed a customizable solution for daily electronical control which is completely customer oriented.

The checkbox makes an automatic back-up of the entered data which you can always consult if necessary!

Programming of the checklists

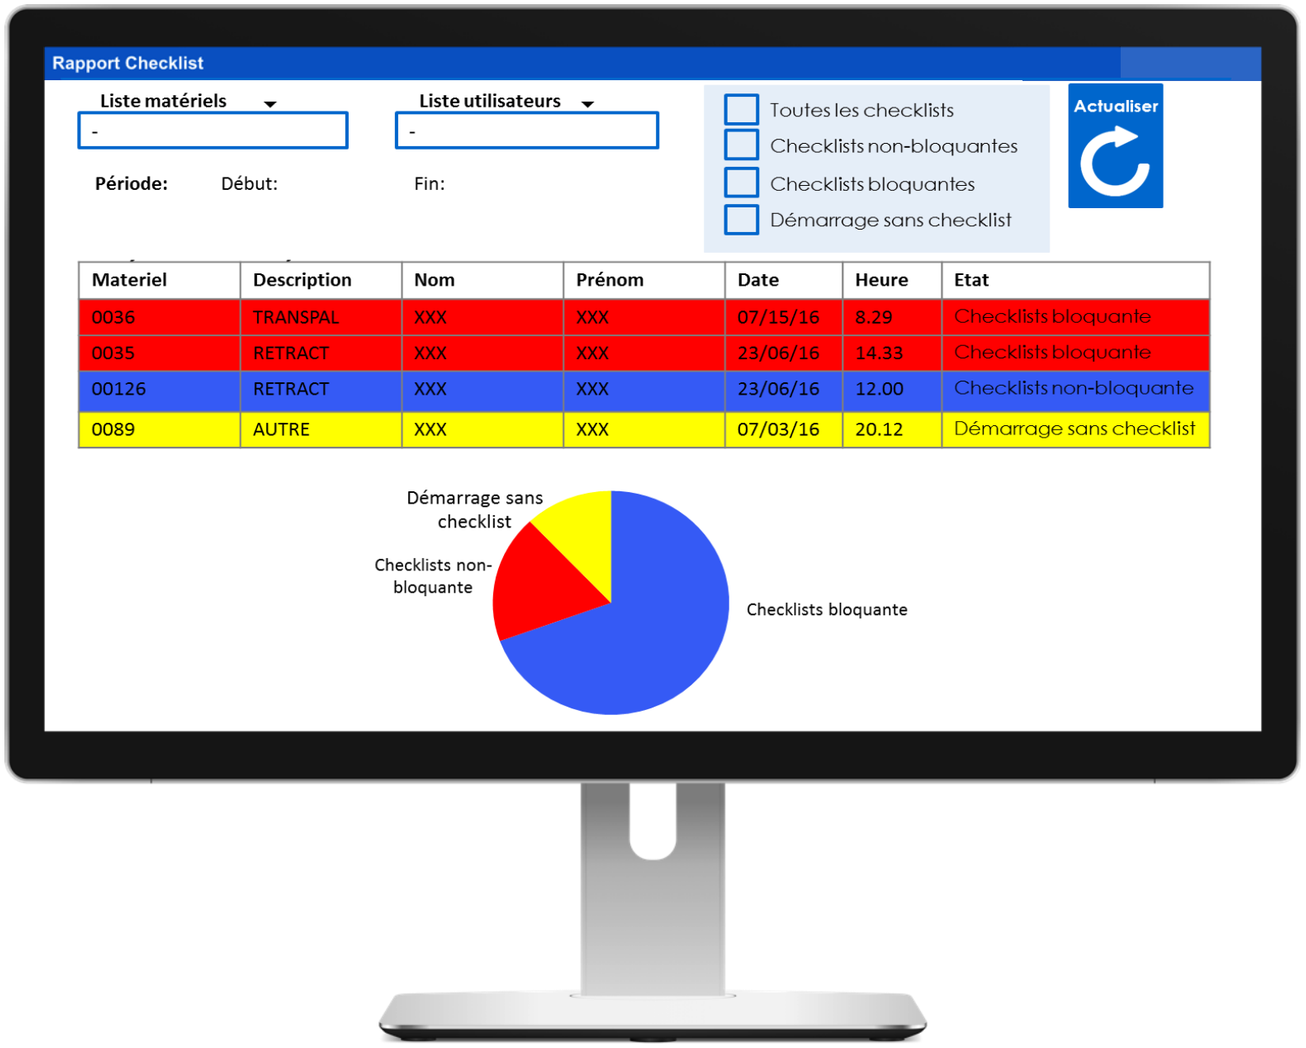
A simple application which alows you to completely customize and adjust the lists to the material if necessary. (for example: checklist forklift, reach truck etc)

You manage the database with data about the users and material and asign them to the correct checklist. Information is transferred through a simple USB key.



Data retrieval

You receive a full report of the checklists as often as you like. ontvangt een volledig verslag van de checklists zo vaak als u wilt. The deviations are marked and can be seen at a glance thanks to clear and logical colour coding.



Materiel	Description	Nom	Prénom	Date	Heure	Etat
0036	TRANSPAL	XXX	XXX	07/15/16	8.29	Checklists bloquante
0035	RETRACT	XXX	XXX	23/06/16	14.33	Checklists bloquante
00126	RETRACT	XXX	XXX	23/06/16	12.00	Checklists non-bloquante
0089	AUTRE	XXX	XXX	07/03/16	20.12	Démarrage sans checklist

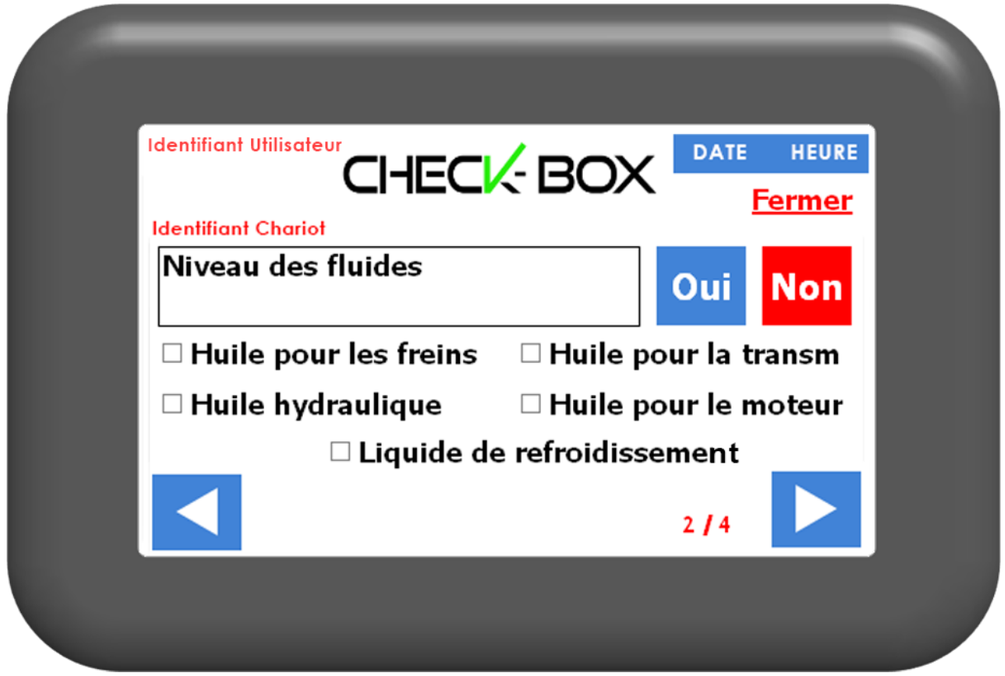
Input of te checklists

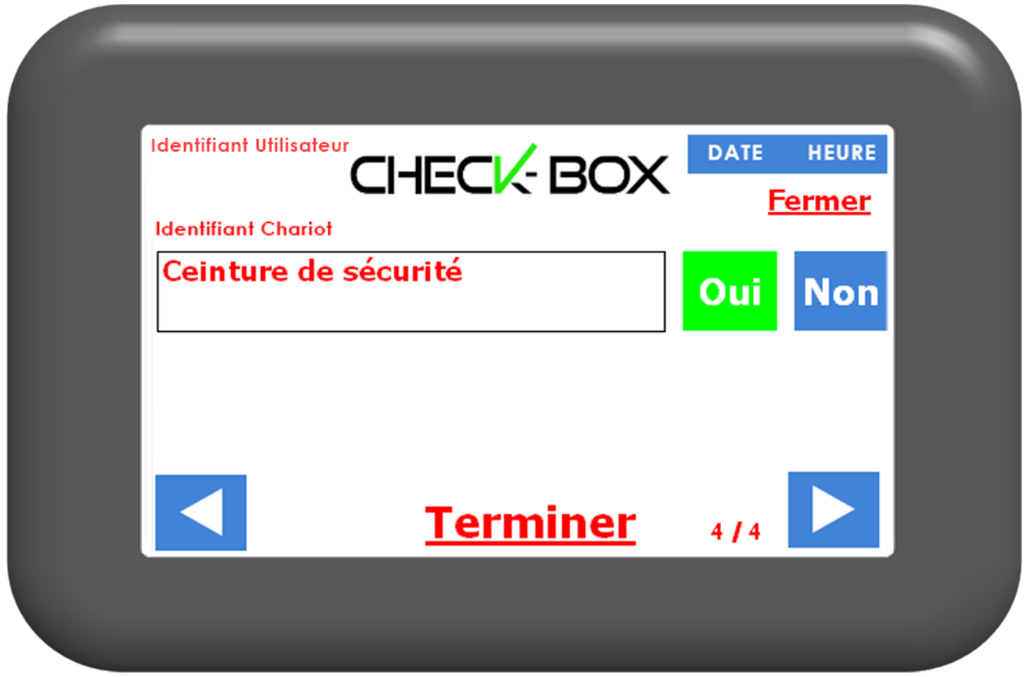
The touchscreen of the checkbox is waterproof. The driver must identify themself and then verify the state of the vehicle. The data is saved and can always be requested.

If necessary the vehicle can be blocked after giving wrong answers. The checklists can be requested even if the vehicle has already been started. (to check the hydraulic points)

Input of the checklists

- Clear input screen
- Simple and quick input
- Validation at the end to save information





Advantages

Personalised questions

Random order of the questions

Adjustable frequention of the checklist(3 times a day, every 4 hours.)
